SUMMARY

Final-year Computer Science student with hands-on experience building responsive web applications using the MERN stack. Core strength in React.js frontend development; comfortable building REST APIs from scratch with Node.js and Express.js, and implementing JWT-based authentication. Currently in the final phase of a full-stack capstone project. Seeking a Frontend Developer or Junior Software Engineer internship/entry-level role.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), React.js, Tailwind CSS, Responsive Design

Backend: Node.js, Express.js, REST APIs, JWT Authentication, MongoDB (Mongoose)

Tools: Git, GitHub, Vite

PROJECTS

HealPath — Doctor-Patient Healthcare Platform (Final Year Project) *React.js, Vite, Tailwind CSS, Node.js, Express.js, MongoDB*

- Built the complete responsive frontend using React.js, Vite, and Tailwind CSS, delivering separate role-based dashboards for doctors and patients.
- Implemented REST API endpoints and JWT-based authentication with Node.js and Express.js for core features including user management and appointment scheduling.
- Part of a full-stack platform that also integrates a payment gateway (Safepay), WebRTC-based video consultations, and an AI health assistant (Google Gemini).
- Currently in the final phase of development — university submission and defense pending.

Reactfolio — Portfolio Recreation (Practice Project) *React.js, Tailwind CSS — shoaib17101.github.io*

- Recreated a senior developer's personal portfolio as a practice project, converting the original React + TypeScript implementation into React with JSX.
- Rebuilt the UI and implemented fully responsive layouts using reusable React components and Tailwind CSS utility classes.

EDUCATION

Bachelor of Science in Computer Science

Bacha Khan University, Charsadda *Jan 2022 – Jan 2026 (Final Semester)*
CGPA: 3.3 / 4.0
